

Heart Attack Warning Signs

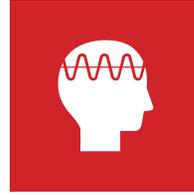

Some heart attacks are sudden and intense, but most of them start slowly, with mild pain or discomfort. Here are signs that can mean a heart attack is happening:

- **Chest discomfort.** Most heart attacks involve discomfort in the center of the chest that lasts more than a few minutes, or that goes away and comes back. It can feel like uncomfortable pressure, squeezing, fullness, or pain.
- **Discomfort in other areas of the upper body.** Symptoms can include pain or discomfort in one or both arms, the back, neck, jaw, or stomach.
- **Shortness of breath.** This feeling often comes along with chest discomfort. But it can occur with or without chest discomfort.
- **Other signs.** These may include breaking out in a cold sweat, nausea, or lightheadedness.

If you or someone you're with has one or more of these signs, dial 911 immediately.

If you're the one having symptoms, and you can't access the emergency medical services, have someone drive you to the hospital right away. Don't drive yourself, unless you have absolutely no other options.

Stroke Warning Signs

Stroke is a medical emergency. Every second counts, because time lost is brain lost. Know these stroke warning signs and teach them to others.

- **Sudden numbness or weakness of the face, arm, or leg, especially on one side of the body.**
- **Sudden confusion, trouble speaking or understanding.**
- **Sudden trouble seeing in one or both eyes.**
- **Sudden trouble walking, dizziness, or loss of balance or coordination.**
- **Sudden, severe headache with no known cause.**

If you or someone with you has one or more of these signs, immediately dial 911 so an ambulance—ideally with advanced life support—can be sent for you.

Also, check the time so you'll know when the first symptoms appeared. It's very important to take immediate action. If given within three hours of the start of symptoms, a clot-busting drug can reduce long-term disability for the most common type of stroke.

For more information, contact your nearest American Heart Association office or dial 800-AHA-USA (800-242-8721) or online at www.americanheart.org.
